Tyco International Companies

Our new solutions give you an **edge**

C•CURE 9000 v1.92 Security and Event Management System

C•CURE 9000 is the first .NET based security solution, making it one of the fastest, most secure systems in the industry. The latest version provides critical access control features, web access, and allows you to manage many security and business applications from one dynamic user interface.

- Area support, anti-passback, intrusion zones, and keypad commands
- Integration with iSTAR Edge for complete decision-making at the door
- Added flexibility with remote web capabilities

C•CURE 9000 Web Client

With C•CURE 9000 Web Client, you have the power and control to remotely manage the security of your enterprise from virtually anywhere.

- Manage personnel records, display dynamic views, and monitor system activity from a Web browser
- Quickly lock/unlock doors and activate events
- Easy-to-navigate graphical user interface

C•CURE 9000 SiteServer

Perfect starting point for small businesses looking for a powerful access control solution.

- Pre-installed and ready to go out-of-the-box
- Cost-effective for small- to mid-sized companies
- Minimal configuring and programming required
- Compatible with wide-range of Software House hardware

iSTAR Edge

First edge door controller with an optional Power over Ethernet (PoE) Plus plug-in module.

With its small, modular design, iSTAR Edge combines cutting-edge IP technology with an advanced feature set and PoE to bring access control decision-making right to the door, making installation easy, cost-effective, and secure.

- Local database capacity of 400,000 records
- Controls and powers all access control devices at the door to minimize installation costs
- PoE Plus enabled – enough power for two doors!
- Full controller capabilities

VideoEdge IP Innovations

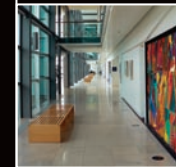

Solutions that expand the capabilities of your enterprise IP surveillance system.

VideoEdge Network Video Management System

- Better searching of stored video footage
- More robust integration
- Larger storage capacities

VideoEdge IP Fixed Cameras

- Indoor and outdoor mini-domes and box cameras
- High performance at bid-winning prices
- High resolution
- True day/night

Kantech Telephone Entry System

Ideal solution for any application with an existing access control system, or one that requires telephone entry access only. Tenants communicate with visitors and grant or deny admittance directly from a telephone land line or cellular phone with the touch of a button.

- Stand-alone or integrated solution
- Remote programming with EntraPass software
- Networkable to manage multiple doors
- Vandal- and weather-resistant housing
- Up to 3,000 tenant capacity
